

For convenience, portability, and compact storage, nothing beats the **MaxJax™** lifting system by Danmar. Thanks to its unique portable design, the **MaxJax™** system offers greater versatility and serviceability when compared to traditional mid-rise or low-rise garage lifting systems.

The **MaxJax** comes equipped with built-in wheels that allows you to use the lift when you need it, then conveniently store it out of the way when not in use; keeping your garage and vehicle lanes clutter free.

The drop-in recessed anchor bolts allow you to secure the **MaxJax** tightly to the floor, and easily unbolt it to move your lift out of the way.

The beauty of the **MaxJax** is that it will fit in almost any home garage, it provides ample lifting height, and it is completely portable. You can use it to lift trucks, cars, motorcycles, even ATVs. All you need is the specified concrete and the right tools and you can have a car lift in your garage. No more wishing, no more waiting: the **MaxJax** is here.

MaxJax

FREE 3" HEIGHT ADAPTERS

Others might charge extra for these necessary adapters, but they're standard with every lift. Ideal for trucks and vans with running boards or auxiliary fuel tanks.

FEATURES

- 6,000 lbs. Lifting Capacity
 - Each MaxJax system comes equipped with a cast iron gear flow divider providing precisely equalized lifting
 - A dual voltage single-phase power unit is small enough to be stored out of the way.
 - Built-in wheels gives this two-post lift portability when you need it
 - Single-piece columns for added strength
 - Dual hydraulic cylinders combined with "direct-drive" lifting system provides rugged dependability
 - Fully adjustable lift arms with stackable adapters
 - Detailed instructions
 - 24-month limited warranty
 - Ability to create multiple installation positions
- *Patent Pending

ACCESSORIES / FEATURES

SOLID-STEEL SAFETY LOCK BARS

Our rugged safety lock bars are capable of holding three times the rated lifting capacity making sure your vehicles are safely elevated and remain secure.

ROTARY GEAR FLOW DIVIDER

A cast iron gear flow divider is the heart of the MaxJax™ system, providing precisely equalized lifting. The specially designed flow divider/combiner is a positive-displacement fluid control device with precise flow division of hydraulic power.

MOBILE CART POWER-UNIT

Our standard mobile power unit cart is small enough to be stored out of the way and features a storage area for the hydraulic hoses. Simple quick-disconnect hoses can be positioned easily for single or dual column operation.

STOW-TO-GO IN JUST MINUTES

A two-post car lift with built-in wheels that allows you to use the lift when you need it, then conveniently store it out of the way when not in use, keeping your garage and vehicle lanes clutter-free.

RECESSED ANCHORS

MaxJax™ concrete anchors are internally threaded to provide flush-mount installation. These specially designed recessed anchors are installed in your concrete floor and remain there permanently.

TWO LIFTS IN ONE

Our optional motorcycle adapter kit allows you to safely lift motorcycles, ATV's or other motorized vehicles to a comfortable working height.

MODEL	MaxJax
Lifting Capacity:	6,000 lbs.
Style:	Portable Two-Post Lift
Overall height:	89" / 2261 mm.
Typical Width (outside of base plate):	105"-125" / 2667 mm. - 3175 mm.
Arm Reach (Minimum):	26" / 658 mm.
Arm Reach (Maximum):	40" / 1016 mm.
Min. Pad Height:	4" / 102 mm.
Max. Lift Height (Pad Only):	45" / 1143 mm.
Max. Lift Height (With Adapter):	52" / 1321 mm.
Motor:	110/220V 1PH 20 Amp
Time of full rise:	45 Seconds
Individual Column Weight:	300 Lbs. / 136 kg.
First Locking Position:	24" / 610 mm.
Second Locking Position:	40" / 1016 mm.
Concrete Requirements:	4" Steel-Reinforced Concrete, 3000 psi
Item Number:	1375659
