Custom Profile Cradle

Thank you for purchasing the Titan Custom Profile Cradle. This cradle is designed for use with low profile custom fenders or fender extensions. It has a lower point of contact to aid in the clearance of most low profile custom fenders. Due to the lower point of contact, the use of straps is recommended with this product to increase stability. It is also recommended to load and unload the motorcycle with extreme caution. This Custom Profile Cradle is designed for wheels from 13" to 22" in diameter and tire width from 70mm to 140mm. The Titan Narrow Tire Adaptor Pad Kit (item #WC-1500X-AP) is recommended for tires less than 100mm in width. For assembly instructions please refer to the instruction manual included with the Titan Bulldog Moto-Cradle base assembly. A copy of the Bulldog Moto-Cradle manual can also be downloaded at www.titanlifts.com for convenience.

Notification:

All illustrations and specifications contained within this manual are based on the latest product information available at the time of printing. Titan Lifts reserves the right to make changes at any time, without notice, in color, materials, equipment, options, specifications and models.
