

# Air Hydraulic Service Jack

Model: ZASJ Series

Capacity: 1.5 Ton ~ 10 Ton

## Usage:

Easy to operate push-button floor jack with an air pump.

Ideal for use in tight spaces including on trucks, automotive and agricultural equipment.

## Special Features:

1. The jack can be operated either manually or pneumatically.
2. Overall construction of selected steel frame, full swivel rear caster wheels and large lifting saddle provide easy positioning and enable these jacks to safely lift to their rated capacities.
3. Quick lift foot pump can easily lift the jack saddle to the loading point.
4. Pneumatic operation requires air pressure ranges from 90 to 140 psi operated by a push button for quick lift.
5. Push button control unit can be easily removed from the handle enabling operator to view the load from various angles.
6. Large release knob provides metered release control.
7. Extra long low chassis reaches under low overhangs for easy load positioning.

ZASJ-100M

- T-Handle can be locked in three different positions.
- Push button control unit can be removed from handle for easy load monitoring.

- Rear Foot Plate and Foot Pedal
