AUTO-INFLATION FOR ACCURACY AND EFFICIENCY!

The Branick BlockHead Auto Inflator removes the need for stick or hand-held gauges! The BlockHead has auto inflate and deflate capabilities with an audible beep to let you know the tire is ready. Just set the pressure, connect the chuck and the auto inflator does the rest. The BlockHead can be wall mounted or mounted on a tire safety cage. A lock-on flow through chuck is included for hands free operation. It is also nitrogen conversion ready, purging the tire before final inflation. The BlockHead comes with a one year warranty.
