Innovative X-Stand™

Assembly Instructions

1. Insert wheels, tighten with 3/4" hand wrench.

2. Use 3/8" bolts to connect lower support tube to frame support tube. Tighten firmly with 9/16" wrench.

3. Install l-bolts using 1/2" hand wrench.

5. Insert right and left adjustment tubes. Tighten T-bolt.

6. Install panel rest assembly using 3/8" shoulder bolt with two flat washers on each end and nylon lock nut. Note: do not overtighten.

Adjustment tubes can be raised and lowered as well as turned inward depending on your application.
