Multiple Configurations Safe-T-Reel Series

Hand Crank Welding Cable Reels

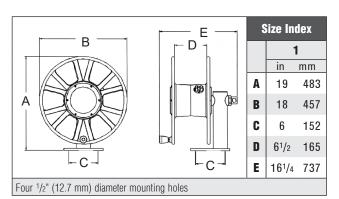

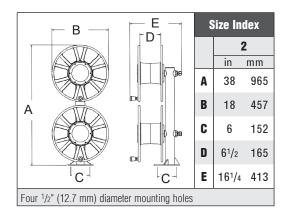

Up to 200' of 2/0 cable

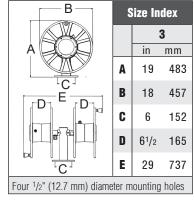

- Designed for manual winding of welding cable
- Ideal for applications where space, weight, and flexibility are key
- Offer trouble-free management of large capacities of cable
- Glass-filled nylon spools are very strong and durable while ensuring that no conductivity occurs
- A substantial welded aluminum base is used to support the weight of the spool
- Oversized bearings heavy duty shaft with tapered roller bearings offer high rigidity and spool support

Side-by-side combinations T-2462-0
