

ZINKO

Aluminum Hand Pump

Model: ZHP-A Series
Capacity: 25 ~ 80 Ton

Usage:

Designed to be used in many different fields with a vast selection of hydraulic components. Industrial quality, general purpose hand pump.

Special Features:

1. The strongest aluminum alloys are used and heat-treated to provide the maximum combination of strength to resist fractures.
2. Lightweight aluminum reservoir for portability.
3. The best choice for applications where composite reservoirs may not be suitable.
4. Large oil capacity to power a wide range of cylinders.
5. Two-speed pumps provide rapid cylinder's stroke at 1st stage, minimizing effort. At the 2nd stage, the pumps automatically switch when a load is applied. This allows for faster fills and reduces cycle times for many testing operations.
