

PROFESSIONAL LIFTING EQUIPMENT

WHEN SAFETY DEPENDS ON PERFORMANCE!

71331

3 Ton Capacity Lightweight Floor Jack

INTENDED USE

A lightweight jack designed for a variety of automotive shop uses. Ideal for roadside service calls.

FEATURES

- Double pump piston raises the saddle to the load quickly.
- 3" low and 19 3/4" maximum lift heights (without saddle adapter).
- 6" low and 22 3/4" maximum lift heights (with saddle adapter).
- Safety bypass and overload systems prevent cylinder damage and prevent the jack from being used beyond the ASME/PASE load-limiting standard.
- Grab handles for positioning and carrying the jack.
- Aluminum wheels.

Also available is our unique 3" saddle extension adapter (Model #71303). Its Patent Pending design has been created to quickly lift the load. Since most SUV's and Service Trucks have a higher low lift height, the increased height of the saddle allows for quicker positioning and quicker lifting of the vehicle. It saves time and effort and increases shop efficiency.

Model #	Capacity	Lift Height		Overall Dimensions		Handle Length	Weight
		Low	High	Length	Width
