

## Shoe Clamp System

### Description

The Wilton Welder's Shoe Clamp System makes it possible to clamp anywhere on a fixture, table or fabricated piece, unlike the C-Clamp which limits clamping to near the edge of a surface. This system consists of a *shoe* (F), which is bolted or welded into place, and the *L-Clamp* (A) with special *mounting foot* that slides into the shoe. Shoes can stay put for convenience and the clamp can still be used on other fixtures by purchasing additional shoes which are available in quantities of six.

### Specifications

Stock Number .....	63295
Nominal Opening Capacity (in.) .....	8-1/2
Throat Depth (in.) .....	5-1/2
Nominal Rail Size (in.) .....	1-13/16" x 9/16"
Nominal Clamping Pressure (lbs.) .....	2,600
Nominal Spindle Diameter (in.) .....	3/4
Net Weight (lbs.) .....	8
Carton Pack .....	1

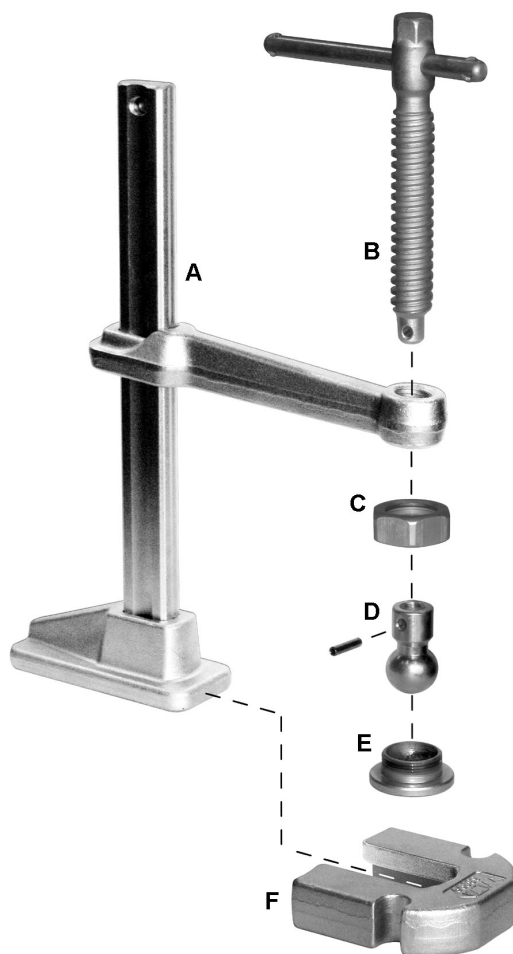

### Application

1. Weld or bolt the *shoe* (F) in place anywhere on a fixture, table or fabricated piece.

**Note:** Welding should only be done by accomplished welders using 7018 filler metals only.
