## **TW-2000 Tweel Handler**

The TW2000 Tweel Handler is a versatile tool that allows truck mechanics to remove, install, rotate and transport single tire-and-wheel assemblies with ease!

- The Tweel Handler's U-shaped chasis allows you to get close to the work area with unhindered access to the tire in the cradle.
- No restraining chains are required, yet the Tweel Handler holds virtually any single truck wheel including wide-based singles.
- Three heavy-duty ball bearing wheels mounted under ball bearing swivel casters make it highly maneuverable.
