

OIL FILTER CRUSHERS

The TSI line of oil filters crushers offers capacity, speed and are designed for any automotive shop, large volume fleet shop and other heavy-duty applications. All models available in 110V, 30A or 220V, 20A

Our most economical filter crusher, the **TC-6** is perfect for small repair and lube shop use. Faster than air operated crushers, the electric/hydraulic system crushes smoothly without the loud “air slamming” of air operated units. This unit will crush all passenger car/light truck oil filters and can be wall mounted or used with the optional stand.

Our most popular model, the **TC-15** crushes up to 4 filters at a time. The workhorse of oil filter crushers, the **TC-15** produces 38,000 lbs of crushing force! The **TC-15** also crushes 1 gallon paint/solvent containers in the 9” x 16” crush chamber.

The **TC-16** delivers a solid 64,000 lbs of crushing force! Crushes multiple automotive, truck and industrial filters in a 15” x 15” x 20” crush chamber. Heavy construction with a 220V motor will insure years of dependable operation. Also available with an AC option which allows the operator to push a button and walk away.
