## **CHARGING PROCEDURE**

1. **WARNING: ONLY USE THE USB CHARGER INCLUDED TO CHARGE THE LAMP** – The use of a NON-recommended charger can cause damage to the lamp or potentially cause a fire.
2. Before first use, charge the lamp for 4-5 hours.
3. Switch lamp off before charging. Connect the included USB/wall charger into the base. Place the lamp into the base with the contact points of the lamp touching the corresponding points on the base.
4. The battery indicator (located below the lens) will blink while the unit is charging.
5. Once the unit is fully charged the battery indicator will stay fully lit.
6. Fully charge the lamp before an extended period of storage.

## SAFETY INSTRUCTIONS

- Do not use the device if there is damage to the housing, plug or cable.
- Do not open device ! There is a risk of electrical shock. Doing so voids any warranties. Return for repair.
- Remove unit from charger and disconnect charger before cleaning.
- **WARNING** : Keep unit away from extreme heat. Do not immerse unit in water. Do not burn to dispose.
- If the battery is damaged or not used correctly, dangerous fluids can leak from the battery. Avoid contact with these fluids because they can lead to skin irritations and severe burns. If you happen to come in contact with these fluids rinse off immediately with soap and water. Seek medical help immediately if the fluids make contact with your eyes or mouth.
- Lamp Lens will heat up and become hot after being on for a short period. **DO NOT TOUCH THE LAMP LENSE TO ANY SURFACE AFTER BEING ON OR AFTER BEING TURNED OFF UNTIL IT IS COOLED.**
- To prevent eye injury and blindness: Do not direct light at eyes. Risk of eye injuries!
- If unit is damaged discontinue use and do not charge.

## Environmental Protection

- Do not discard the device with normal house hold waste.
- Use proper disposal center for Li-on and Li-Po battery recycling or disposal
- Risk of fire : Do not puncture, crush or burn batteries inside the unit.

the 1990s, the number of people in the world who are illiterate has increased from 1.1 billion to 1.2 billion. The number of illiterate people in the world is expected to increase to 1.5 billion by the year 2015 (UNESCO, 2003).

There are many reasons for the increase in illiteracy. One of the reasons is that the population of the world is increasing rapidly. Another reason is that the quality of education is declining in many countries. In addition, the cost of education is increasing, which makes it difficult for many people to afford it. Finally, the lack of interest in education is also a major factor.

There are many ways to reduce illiteracy. One way is to improve the quality of education. This can be done by increasing the number of teachers and improving their training. Another way is to reduce the cost of education. This can be done by providing free or low-cost education. Finally, it is important to create a culture of learning and to encourage people to value education.

There are many challenges to reducing illiteracy. One challenge is that there are many people who are illiterate and who do not have the resources to learn. Another challenge is that there are many people who are illiterate and who do not have the motivation to learn. Finally, there are many people who are illiterate and who do not have the opportunity to learn.

There are many ways to overcome these challenges. One way is to provide free or low-cost education. Another way is to provide learning materials and resources. Finally, it is important to create a supportive environment for learning and to encourage people to learn.

There are many benefits to reducing illiteracy. One benefit is that it helps to improve the quality of life. Another benefit is that it helps to reduce poverty. Finally, it helps to create a more educated and productive workforce.

There are many ways to measure illiteracy. One way is to count the number of people who cannot read and write. Another way is to measure the number of people who cannot understand and use written information. Finally, it is important to measure the number of people who cannot participate in society.

There are many ways to reduce illiteracy. One way is to improve the quality of education. Another way is to reduce the cost of education. Finally, it is important to create a culture of learning and to encourage people to value education.
