

17 GALLON POLY LOW-PROFILE OIL DRAIN

Designed for use with heavy-duty trucks, buses, RVs and other low-profile heavy-duty equipment, this oil drain is ideal for use with oil and engine coolants. Use this low-profile oil drain with a pump assist evacuation system or an optional 110V electric pump. This high-impact polyethylene tank is strong and durable, dent resistant and lightweight for easy handling.

Features include:

- 17-gallon capacity
- 7-3/4" ground clearance
- High-impact roto-molded polyethylene construction
- Reinforced ribbing increases drain durability and prevents bowing
- Four-caster design provides superior stability and mobility
- Long-reach T-Handle makes positioning under the vehicle easy.
- T-Handle folds for compact storage
- Expanded metal shield reduces splash
- Recessed drain valve for optimal protection
